### Cake Type Light

Paleontological classifications previously used Hydrochoeridae for all capibaras, while using Hydrochoerinae for the living genus and its closest fossil relatives, such as *Neochoerus*, but more recently have adopted the classification of Hydrochoerinae within Caviidae. The taxonomy of fossil hydrochoerines is also in a state of flux. In recent years, the diversity of fossil hydrochoerines has been substantially reduced. This is largely due to the recognition that capibara molar teeth show strong variation in shape over the life of an individual. In one instance, material once referred to four genera and seven species on the basis of differences in molar shape is now thought to represent differently aged individuals of a single species, *Cardiatherium paranense*. Among fossil species, the name “capibara” can refer to the many species of Hydrochoerinae that are more closely related to the modern *Hydrochoerus* than to the “cardiomysine” rodents like *Cardiomys*. The fossil genera *Cardiatherium*, *Phugatherium*,

### Cake Type Regular

#### ABOUT CAKE TYPE

Is Cake Mono not typewriter-ry (typewriter-ish? typewriter-esque?) enough for you? Cake Type – the typeface, not to be confused with CakeType, the foundry; notice the space – is a rough version of Cake Mono. Its irregular contours soften up the technical appearance of the letters by suggesting ink spread on paper. Hear the clickety-clack of typewriter keys triggering the arms; feel the metal type bars hit the page. If not, may we suggest sounding out the rhythm with your mouth while typing? Cake Type acquires materiality that adds a human touch to your text.

#### ABOUT CAKETYPE

Pieter van Rosmalen founded CakeType in 2004 primarily as a boutique to distribute some of his early typefaces. In 2008, Pieter started Bold Monday together with Paul van der Laan. The type foundry's initial retail collection merged the CakeType library and Paul's typefaces. However, some of Pieter's older type designs didn't really fit the Bold Monday library and remained in "the vault" – not Prince's legendary vault but just as cool and mysterious. CakeType reopened its online doors in 2022 to serve as a vehicle for those hidden gems. This dedicated space allows them to shine in all their quirky glory.

#### ABOUT PIETER VAN ROSMALEN

Pieter van Rosmalen studied advertising and graphic design at Sint Lucas in Breda. He started dabbling in type design at a young age and licensed his early fonts through the iconic type foundry GarageFonts in the late nineties. In 2002, Pieter graduated from the postgraduate Type & Media program at the Royal Academy of Art (KABK) in The Hague. After working at various advertising and design firms – Het Hoofdbureau in Amsterdam and Teldesign in The Hague, among others – he decided to go it alone in 2004, when he founded graphic design agency CakeLab and type foundry CakeType. Since 2009, Pieter has mainly focused on typeface design. His work has received several Certificates of Excellence from the Type Directors Club, and he won second prize in the prestigious Granshan Type Design Competition in 2019.

#### ABOUT CAPIBARA KEES

Capibara Kees – the Dutch first name Kees sounds like "case" – was born in the Amazon river delta in Brazil. The dashing dude's date of birth is unknown. Kees belongs to the Capibara (or Capybara) species, the largest living rodent on planet earth. In mid-2001, Kees traveled to The Hague to study graphic and type design at KABK, where he met Pieter. Banding together to form a creative powerhouse, Pieter and Kees designed the Capibara typeface and the corresponding specimen "Heer van het gras." Kees was integral in naming Pieter's type foundry in 2004 – quite literally, because CakeType is short for CApibara KEes TYPE Foundry. How's that for a surprise ending? Did you really think this was all about dessert?

---

#### FONT FORMATS

All our typefaces are provided in OTF, TTF and WOFF2 formats. You can install the fonts on your desktop, serve them on websites using CSS @font-face, or embed them in mobile apps and e-books. Other web formats – WOFF and EOT – are available on request.

#### LICENSES

We offer clear and simple licenses which can be purchased by one simple mouse click or finger tap. Our licenses are perpetual and do not require subscription. If you outgrow your current license, you can upgrade by buying the same license again to stack the amount of users, domains and apps/ebooks, or by buying a larger license.

##### SMALL LICENSE

desktop: 1 user  
web: 1 domain – 50,000 unique visitors p/m  
app/e-book: 1

[More information](#)

##### MEDIUM LICENSE

desktop: 10 users  
web: 5 domains – 500,000 unique visitors p/m  
app/e-book: 5

[More information](#)

##### LARGE LICENSE

desktop: 25 users  
web: 10 domains – 1,000,000 unique visitors p/m  
app/e-book: 10

[More information](#)

##### TRIAL LICENSE

You can use our free trial fonts for evaluation and internal testing only. The trial fonts have a limited character set and no OpenType features or kerning.

[More information](#)

##### CUSTOM LICENSE

If none of the licenses above fit your needs, please get in touch for a custom license to accommodate your particular preferences and requirements.

[Get in touch](#)

##### STUDENT DISCOUNT

We offer a student discount on all our typefaces. E-mail us a copy of your valid student ID and we will send you a voucher code for a 50% discount in return.
